Silicone Pressure Sensitive Adhesive

52,000/lbs available

Product Description

Silicone PSA in a xylene solution of phenyl base polysiloxane gum and resin. Supplied at 56 percent silicone solids and may be further diluted with aromatic, aliphatic or chlorinated solvents. May also be blended with resin dispersions to obtain specific performance properties.

Performance Properties

Wide temperature range performance
Adhesion to wide variety of surfaces (silicones, fluoropolymers, polyolefines)
Excellent electrical properties

Product Data

Silicone Solids, %	56
Specific Gravity, 25°C	0.99
Visc @ 25°C, cPs	65,000
Color	Light Straw
Flash °C	12
Solvent	Xylene
